Education

Technological University of the Philippines - Visayas

Bachelor of Science in Electronics and Communications Engineering
DOST Junior Level Science Scholarship (JLSS) Awardee

Talisay, Neg. Occ.
September 2020

La Castellana National High School

Valedictorian

La Castellana
April 2015

La Castellana Elementary School

Valedictorian

La Castellana
March 2011

Experience

Department of Education.

ICT Coordinator and Teaching personnel

La Castellana, Negros Occidental
January 2021 - Present

- Managed and maintained ICT infrastructure including computer laboratories, network equipment, and peripherals across the school or division office.
- Developed and maintained Excel VBA scripts to automate encoding, validation, and consolidation of student enrollment data, learner information, and school report submissions
- Performed data validation routines to ensure accuracy and completeness of DepEd data submissions (EBEIS, LIS, LRMS) prior to uploading to national systems.
- Organized and structured large administrative datasets using scripted data organization workflows, enabling faster generation of division-level reports
- Conducted basic Python scripts for batch processing and formatting of CSV exports from DepEd systems for local database use

Microtech Industrial Solutions Inc.

Instrumentation and Automation Technician

Biñan, Laguna
January 2018 – September 2018

- Installed, calibrated, and maintained instrumentation systems including PLCs, pressure transmitters, flow meters, and temperature controllers across active industrial production lines.
- Developed Excel VBA scripts to automate equipment maintenance logs and preventive maintenance reports, reducing manual encoding time.
- Collaborated with senior engineers to review P&IDs and update instrument calibration documentation in compliance with plant safety and quality standards.
- Responded to instrumentation alarms and performed corrective maintenance to minimize production downtime.

Department of Science and Technology PCAARRD

Research Assistant

Talisay, Negros Occidental
March 2017 - December 2017

- Assisted principal investigators in collecting, encoding, and organizing field research data related to agricultural systems monitoring and automation projects.

- Performed data validation and cleaning using basic Python (pandas) scripts to identify and remove duplicate or out-of-range sensor readings.
- Prepared and maintained research documentation including data collection forms, field logs, and technical summaries submitted to DOST for program evaluation.
- Coordinated with field technicians to ensure consistent data collection procedures across multiple sampling sites.

Leadership & Activities

Institute of Electronics Engineers of the Philippines (IECEP)

2015 - 2020

Student Member / Chapter Officer

- Participated in chapter activities, technical seminars, and review sessions in preparation for the Electronics Engineer Licensure Examination.
- Assisted in organizing campus-wide electronics engineering events and competitions promoting technical excellence among ECE students.
- Collaborated with fellow student members on community outreach and technology awareness programs.

Skills & Interests

- **Technical:**
 - Excel VBA Scripting (Advanced) — automation macros, data validation scripts, data organization and reporting
 - Python (Intermediate) — data validation and cleaning with pandas, data organization scripts
 - Power BI (Intermediate) — dashboard creation, data visualization, report publishing
 - Power Query (Intermediate) — data transformation, merging and appending tables, automated ETL workflowss
 - PLC programming basics
 - Microsoft Office Suite (Advanced)
 - N8n and Zapier (Advanced)
- **Language:** Filipino (Native), English (Proficient — reading, writing, and verbal communication)
- **Interests:** Building and assembling electronics and automation systems; designing scripted workflows and data pipelines that solve real operational problems; hands-on fabrication and prototyping of control and instrumentation setups
